

PCI 1-2-3

A simpler path to PCI Compliance

The Payment Card Industry (PCI) Security Standards Council created the PCI Data Security Standard (DSS) to help merchants, like you, proactively protect payment card data.

As a merchant that accepts credit cards, you must be PCI compliant and you must prove your compliance every year. If you don't, you risk costly fines, audit costs, restrictions or worse should a breach occur.

Achieving PCI compliance can be as easy as 1-2-3.

ControlScan offers a simple Self-Assessment Questionnaire (SAQ) and scanning solution to help you achieve and prove PCI compliance. In addition, the ControlScan experts are available to provide step-by-step assistance for any PCI questions you may have.

The screenshot shows the ControlScan web portal interface. It features a navigation bar with 'My Portal' and 'Resources'. The main content area is divided into three columns: 'PCI Compliance', 'Third Party Assurance', and 'Reports'. The 'PCI Compliance' section includes a 'PCI Questionnaire' (marked 'Finished in 365 days'), a 'Quarterly PCI Scan' (marked 'Expires in 90 days'), and a 'Download Certificate' button. The 'Third Party Assurance' section lists providers like 'ATPlusSoft, Inc.', 'ControlScan', and 'Philomene POS Service and Sales'. The 'Reports' section shows a table of vulnerabilities. Below the main content are two article teasers: 'PCI Risk Brings New PCI Service Provider Requirements Impacting ISOs' and 'The ISO's Risky Business: Why and How to Apply New PCI Service Provider Requirements'. Callout boxes point to these features: 'PCI 1-2-3 Self-Assessment Questionnaire' points to the questionnaire; 'Easy access to live support' points to the 'Support' icon in the top right; 'PCI Vulnerability Scanning' points to the 'Quarterly PCI Scan' section; and 'Educational compliance and security content' points to the article teasers.

PCI 1-2-3 will guide your business through the PCI DSS requirements.
