Verifone & Gilbarco require certified Managed Network Service Providers (MNSP's) to provide all-in-one firewall and POS Zone Router service to allow remote Help Desk and software download support. All CITGO-authorized firewall providers are certified MNSP's with Verifone and Gilbarco. Other POS vendor certified MNSP's not listed here are not allowed, tested or certified for use on the CITGO EPOS network.

*"If you are a merchant that accepts payment cards, you are required to be compliant with the Payment Card Industry Data Security Standard ("PCI DSS")."*

Source: [www.pcisecuritystandards.org](http://www.pcisecuritystandards.org)

*PCI-DSS Requirement #1 for merchants is to install and maintain a firewall*
