

PCI 1-2-3

A simpler path to PCI Compliance

The thought of losing or compromising a valued customer's personal information is a critical concern for you and your Retailers. It makes shoppers reluctant to buy, which costs you business. The Payment Card Industry (PCI) Security Standards Council created the PCI Data Security Standard (DSS) to help merchants, like you, proactively protect payment card data.

As a petroleum marketer that processes and transmits customer account data, you must comply with the PCI DSS controls and processes. If you don't, you risk costly fines, audit costs, restrictions or worse should a breach occur.

Achieving PCI compliance can be as easy as 1-2-3.

PCI 1-2-3 Self-Assessment from ControlScan helps cut through the complexity of achieving PCI DSS compliance and allows you to easily analyze and validate compliance. In addition, our team of experts is available to provide step-by-step assistance for any PCI questions you may have.

PCI 1-2-3 will expertly guide your business through the PCI DSS requirements.

ControlScan makes it easier for CITGO-branded Marketers and Retailers to meet PCI requirements and protect customers' important information. PCI 1-2-3 provides the tools and support you need to analyze, remediate and validate PCI compliance including:

SmartSAQ

- Step-by-step guidance through the Self-Assessment Questionnaire (SAQ)
- Easy-to-understand help-text
- Pictures that clearly explain key concepts
- Saves time and eliminates frustration

SmartScan

- External vulnerability scans
- Reports that meet Approved Scanning Vendor (ASV) requirements
- Vulnerabilities prioritized by severity
- Instructions for correcting issues

Specialized Support

- U.S.-based support team
- Deep understanding of PCI compliance and security best practices
- Experience working with businesses and organizations of all types and sizes

Special Program Pricing for CITGO Marketers and Retailers
